svlOverlayBlobs

```
graph BT; svlOverlayBlobs --> svlOverlay; svlOverlayBlobs --> svlOverlayInput;
```

The diagram illustrates a hierarchical structure where 'svlOverlayBlobs' is the parent component, branching into two child components: 'svlOverlay' and 'svlOverlayInput'. A horizontal line connects the two child boxes, and a vertical line descends from its center to the top of the 'svlOverlayBlobs' box. From this vertical line, two arrows point upwards to the bottom of the 'svlOverlay' and 'svlOverlayInput' boxes respectively.
